

Help Make **Cervical Cancer** Screening Easier for Everyone!

Did you know there are safe and effective tests that can help detect changes before cervical cancer develops?

We want to hear from people across Canada about their experiences with cervical screening.

Cervical screening helps identify changes in the cervix that could lead to cancer.

This can be done with:

Pap Test

HPV Test

Join Our Research Study

Take part in a 30-60 minutes online conversation

Receive a gift card as a compensation for your time

Participation in this research study is voluntary.

Who can join?

- Women and anyone with a cervix (ages 18 and older)
- Live anywhere in Canada
- People who have faced challenges getting screened

Why join?

- Help make cervical screening information clear and useful
- Support a project that makes healthcare easier to access
- Your voice matters!
