

# What gets in the way of cancer care for people who use drugs?

## Participate in our research study!

### Who?

Adults (age 18+) who use/have used drugs and have been diagnosed with cancer (any type, any stage), OR caregivers to someone that has been diagnosed with cancer who uses/has used drugs (including bereaved caregivers).

### What?

A **PhotoVoice Study** in which you will learn how to take and share photos and stories that represent your experiences with cancer care. You will be compensated for your time.

### Why?

People who use drugs face more challenges in accessing and receiving cancer care. This study will help us understand the barriers to care for people who use drugs. It will also help us develop solutions to improve the accessibility and quality of cancer care.
